EMD proposes:

► Changing the ordinance to increase the term of inactivation permits from 2 years to 5 years.

► Inactivation permit fees will continue to be waived when renewed, for up to 10 years.

► Well owners will be contacted when renewals are needed.

## Background

The Abandoned Well Program (AWP) was enacted in 2009, when EMD received funding to support a Supplemental Environmental Project (SEP). Abandoned wells pose a hazard to public health, safety, and the environment. The SEP is being utilized to identify, assess, and reduce hazards from existing abandoned wells.

The AWP issues well inactivation permits to well owners who intend to use inactive or abandoned wells in the future.
