

COUNTY OF SACRAMENTO ENVIRONMENTAL MANAGEMENT DEPARTMENT  
SOLID WASTE PROGRAM  
LOCAL ENFORCEMENT AGENCY LEA)

Date of Notice: March 12, 2018

**CORRECTED  
NOTICE OF ISSUANCE  
OF A REGISTRATION PERMIT FOR  
A MEDIUM VOLUME  
IN-VESSEL DIGESTION FACILITY**

---

**PROJECT TYPE/NUMBER:** Registration Permit  
Medium Volume In-Vessel Digestion Facility  
Permit # 34-AA-0235

**PROJECT NAME:** Incline Clean Energy, LLC

**PROJECT LOCATION:** 8550 Fruitridge Road  
Sacramento, CA 95826

**APPLICANT:** Incline Clean Energy, LLC  
P.O. Box 12219  
Zephyr Cove, NV 89448

**APPLICANT CONTACT:** George Eowan  
(916) 996-5938

**DATE APPLICATION RECEIVED:** February 9, 2018

**DATE LEA ACCEPTED  
APPLICATION:** March 1, 2018

**LEA CONTACT:** Lisa Jameson  
(916) 876-7883

## **Introduction**

Please be advised that the County of Sacramento Local Enforcement Agency (LEA) received and accepted a Registration Permit application from Incline Clean Energy, LLC, to operate a Medium Volume In-Vessel Digestion Facility. The LEA is certified by the California Department of Resources, Recycling, and Recovery (CalRecycle) to issue permits and enforce state laws and regulations at solid waste facilities within the County of Sacramento. Pursuant to 14 California Code of Regulations (CCR), section 18104.2, the LEA is required to post notice after finding the application complete and correct pursuant to 14 CCR section 18104.1.

## **Description of project**

On February 9, 2018, LEA staff received a Registration Permit application package from Incline Clean Energy, LLC (formerly known as CleanWorld SATS Biodigester, LLC), to operate a Medium Volume In-Vessel Digestion Facility. Under the Registration Permit, the facility may accept up to 100 tons per day of source separated organics (food waste). Liquid materials are pumped directly into the digester. Solids are tipped, loaded into a bioseparator where the organic material is separated from the physical contaminants, mixed, and then pumped into the in-vessel digester. Anaerobic bacteria convert the feedstock into biogas, composed primarily of carbon dioxide, hydrogen, and methane. The biogas is cleaned and compressed, producing "compressed natural gas" (CNG), which is stored at the fueling station on-site and used to fuel refuse collection fleet vehicles. The residual liquid and solid digestates are discharged respectively to the sanitary sewer or the solid waste landfill.

## **LEA Determination**

On February 9, 2018, the LEA received an application for Registration Permit to operate a Medium Volume In-Vessel Digestion Facility. The LEA accepted the application as complete and correct on March 1, 2018, pursuant to 14 CCR section 18104.1, and issued the permit.

## **Opportunity to comment**

Pursuant to 27 CCR section 21660.3 (a)(9), written comments on the Registration Permit may be sent to the Sacramento County Environmental Management Department, Attn: Lisa Jameson, 10590 Armstrong Avenue, Mather, CA 95655. Written comments will be forwarded to CalRecycle within five days of receipt pursuant to 14 CCR section 18104.3 (d).

## **Additional Information**

A copy of the approved application package for the Registration Permit is available for public review by appointment at the Environmental Management Department, located at 10590 Armstrong Avenue, Suite A, Mather, CA 95655. Please contact Lisa Jameson at (916) 876-7883 for more information.
